

Format for sharing you projects on the Geosciences Honours College website

1. What is the title of your project (how you want it to be named on the website)
2. Briefly describe your project in not more than 50 words (this will be on the overview page).
3. If you have an image of your project or which is related to your project, please send this along with your text, along with the source. (**IMPORTANT NOTE**: this image should be **COPYRIGHT FREE**). If you do not have an image, please let us know here what kind of image you would want to go your text along with, so we can look for a suitable copyright free image.
4. Elaborate a bit more on this description, make a text **no longer** than 200 words about your project, the goal of this project, and the process about this project (this will be the introductions of the page).
5. Now the project itself. This is different for every project. Please describe here how you want your project presented on the page (and give the necessary links, information, etc.). If it if for example a text, the text can pre presented here. If it is a YouTube video, please offer the link, so we can implement it on the page. If you are unsure how you want to or can implement your project into the page, please contact us.
